EXPLICACIÓN DE LAS TABLAS DE INTERÉS.

La cantidad ó capital sobre la que se desea encontrar el interés, se hallará siempre en el encabezamiento de las tablas, por orden numérico sucesivo con la palabra **pesos** junto á la cantidad.

Los números 5, 6, 7, 8, 9 y 10 á la cabeza de las columnas, significan el interés ó tanto por ciento.

El tiempo sobre que se quiere encontrar el interés, se halla en la primera columna de cada página, con el encabezamiento de **tiempo.**

Sobre la línea doble que divide la página horizontalmente está el **interés simple;** bajo la línea, el **interés compuesto.**

Para hallar el interés en **100** pesos al **10** por ciento por **2 años, 6 meses** y **18 días,** véase la página encabezada por 100 pesos, y en la primera columna, que marca los **días** búsquese el número 18, y frente á éste en la marcada con el número 10, se encontrará el número 50, que son los centavos que representan el interés de los 100 pesos en 18 días. Después, en la primera columna se busca bajo los meses el número 6, ó sean los meses, y bajo la misma columna del 10 se encuentran cinco pesos, que es el interés de los 6 meses; después se busca en la primera columna los dos años, y frente á ella en la misma columna del 10 se hallan 20 pesos, interés de los dos años, y todo sumado hacen $25.50 que resultan de esta manera en el problema puesto, que llamamos.

EJEMPLO PRIMERO.

Hallar el interés de 100 pesos al diez por ciento por 2 años, 6 meses y 18 días.

Interés por 18 días,		50 cts.
" "	6 meses,	5.00
" "	2 años,	20.00
		$25.50 forman el interés total por el tiempo dado.

Para hallar el interés de 150 pesos por 2 años 6 meses y 18 días, al 10 por ciento, búsquese el interés de 100 pesos, como se hizo en el ejemplo primero en la página anterior, y entonces véase la página de los 50 pesos y haciendo lo mismo que en el caso dado, el interés que se encuentre por los 50 pesos se añade al de los 100 y se obtiene el total.

EJEMPLO SEGUNDO.

Hállese el interés de 150 pesos por 2 años, 6 meses y 18 días.

Interés en 100 pesos,	por 18 días,	$ .50
	" 6 meses,	5.00
	" 2 años,	20.00
Interés en 50 pesos,	por 18 días,	$ .25
	" 6 meses,	2.50
	" 2 años,	10.00
		$38.25 Interés de 150 pesos por 2 años, 6 meses y 18 días.

Para hallar el interés de $150.50 al 10 por ciento en 2 años, 6 meses y 18 días, como en el ejemplo segundo, se encuentra lo correspondiente á $150: después en la página de los 50 pesos, se halla el interés por 50 que es 25 cents, pero como los 50 centavos son la centava parte de $50, el interés que corresponde es $^{25}/_{100}$ de centavo, que por pequeño se desprecia. Después se sigue hasta los 6 meses, que resultará $2.50 pero la centava parte de esto son 2 cents $^{50}/_{100}$ de centavo, que se escribe como un centavo, y resultan por los seis meses 3 cents. Siguiendo hasta los dos años encontraremos que son $10 pesos; pero á los 50 cents, solo les corresponde 10 cents. que unidos á los 3 que antes se tenían, resultan 13 cents. interés de los 50 cents. por 2 años, 6 meses y 18 días.

Exactamente son 12 cents y $^{75}/_{100}$ de centavo; pero como en esto no se cuentan fracciones, ponemos 13 cents.

EJEMPLO TERCERO.

Interés de $150 por 2 años, 6 meses y 18 días,	$38.25
" " 50 cents, por 6 meses	03
" " 50 cents, por 2 años	10
Interés de 150 $^{50}/_{100}$ por 2 años, 6 meses y 18 días	$38.38

El interés de pesos está expresado en pesos y centavos, el interés de centavos en centésimos de centavo.

Cualquier otro interés se calcula lo mismo que lo hemos hecho con el 10 por ciento.

El interés compuesto se computa como el simple.

TABLA DE VENCIMIENTO PARA DESCUENTOS.

Incluyendo Los Tres Días de Gracia.

TABLA DE VENCIMIENTO.

Esta tabla hace ver correctamente el mes y el día en que un pagaré, letra, nota ó factura vence, contando ó no los tres días de **gracia** generalmente acordados en el comercio.

Si se da un pagaré á **100 días,** y está fechado el dia 25 de Agosto y se desea saber el día del vencimiento, véase la **Tabla de Vencimiento,** desde la izquierda de la página búsquese por el encabezamiento hasta llegar á Agosto, sígase la primera columna de números hasta el día 25 y en frente se halla la cantidad 237 que deberá escribirse, añadiéndose á ella 100 días, con lo que resultarán 337; entonces búsquese este número en los consecutivos de la tabla, y al frente se ve el **3 de Diciembre** que es el día en que vence el **pagaré ó nota.**

Si es necesario, se añaden á los 100 los tres días de gracia, y la nota ó el pagaré se ve que vence el día 6 de Diciembre.

Como esta tabla está arreglada para años ordinarios de 365 días, cuando al contar el tiempo se incluye Febrero, en año bisiesto, la nota ó pagaré vencerá un día antes.

Si la nota ó pagaré vence en Domingo ó día de **fiesta legal,** deberá presentarse el Sábado ó el día antes de la fiesta.

EXPLICACIÓN

DE LA

TABLA DE VENCIMIENTO.

Si se desea encontrar el número de días que pasan desde el 20 de Octubre al 12 de Junio, tómese la **tabla** y sígase sobre las casillas del encabezamiento, hasta que se llega á Octubre, y siguiéndose para abajo la columna de los días del mes, que es la de la izquierda, hasta que se llega al día 20 de Octubre al frente en la misma columna se lee el número 293 que deberá escribirse. Hecho esto, se siguen los encabezamientos hacia la derecha, hasta que se llega á Junio, se baja siguiendo la línea de los días hasta que se halla el día 12, y junto á él se lee el número 528. De este número 528 se resta el 293 que antes hallamos y nos resulta que son 235 días.

Si estos quieren reducirse á meses, divídase por 30 y se tendrán 7 meses y 25 días.

EJEMPLO.

528
menos, 293

igual á 235 días, que divididos por 30 nos resultan 7 meses y 25 días.

Al contar interés en un pagaré ó nota, al cual se dan cierto número de días, estos días se cuentan sin hacer caso del mes; pero contando el interés por meses, el número de meses deberá tomarse en cuenta.

Cuando el año es bísiesto y al contar el tiempo se incluye Febrero deberá añadirse un día más.

Nota Importante.—En las tablas de interés la parte baja de cada página, está dividida por una **línea horizontal**; y allí se encuentran los cálculos de interés compuesto con la abreviatura **com.**
